Siemens Plessey Controls Ltd (Traffic Division) - SCOCOM equipment is used in Toronto, Barcelona, Vancouver, Paris, Sao Paulo, and Dubai, among others.

Siemens Plessey Defence Systems Ltd - The Command and Control Information System (CCIS) developed by Siemens Plessey Controls Ltd (Traffic Division) systems. Electronic Support Measures (ESM), and Electronic Warfare are used to manipulate and display information from diverse sources such as electronic, acoustic, and optical sensors, to support Force Protection, Support Communications, and Intelligence Systems.

Scheggen Information System - The countries participating in the system are Belgium, the Netherlands, Luxembourg, France, Germany, Portugal, Spain, Austria, Greece, Sweden, Denmark, Finland, and Norway. The system was developed by the Scheggen Group, a company established by about 100 companies and institutions from these countries. It is used for the detection and monitoring of activities that contravene the laws of the countries involved. The primary objective is to improve the efficiency of the system by ensuring that all data is processed in a timely manner. The system is based on a network of powerful and reliable computers that are connected to a central database. The database is used to store information about suspicious activities and to alert the authorities to any potential problems.
